Programming: C++, Blueprints, GDScript, C#, JavaScript, TypeScript, Java, HTML, CSS, Python

Tools/Frameworks: Unity, Unreal Engine 5, Godot, VS Code, GitHub

Spoken Languages: English (fluent), Korean, Spanish (minimum professional), Mandarin Chinese (limited working)

Experience

MAGIC Spell Studios

Rochester, NY

UI and Tools Developer

May 2026 – Dec. 2026

- Developed *Configura*, an open-source Godot plugin to create character creators from a 3D model.
- Published to the Godot Asset Store, receiving 150+ downloads.

Projects

Interlinked – Unreal Engine 5 | C++, Blueprints

Gameplay and AI Developer

- Used Unreal Engine 5's Gameplay Ability System (GAS), reducing implementation overhead and standardizing ability activation, cooldowns, gameplay effects, attributes, and cues.
- Researched and implemented procedural animation for AI enemies using Unreal's locomotion plugin.
- Implemented AI behavior (patrolling, player detection, movement, projectile attack) and group formation (enemies perceive each other, dynamically join into a line, maintained formation slots while navigating, reassign positions when allies die or new enemies are near, and synchronized attacks). Used Behavior Trees, Blackboards, and AI Controllers.

Pizza Saucer – Unity | C#

Producer, Developer, Designer

- Led a 5-person interdisciplinary team through a semester Agile production cycle, shipping a complete game on itch.io.
- Developed core gameplay systems, including a recipe book system with data serialization and information unlocking.
- Co-designed narrative structure, integrating dialogue clues with gameplay progression and world exploration.

Restoring Hope (Class Choice Award) – Unity | C#

Puzzle Lead, UI Designer, Developer

- Led puzzle design by conceptualizing and implementing multiple core puzzles and overseeing other designers.
- Defined overall game flow including puzzle placement, item interactions, and collectible systems.
- Worked closely with artists to implement UI, layouts, animations, environmental assets, and promotional materials..

Ultimate – React | JavaScript, CSS, TypeScript, HTML

Solo Developer

- Implemented complex multi-board game logic using React Hooks and state management.
- Styled user interface with React Router and CSS for easy navigation between pages and an intuitive layout.
